

**Sky Financial Super Late Model Series  
Mark McGregor Memorial Dairy Queen 150  
Working Papers**

According to the Sky Financial Series rules package, cars are to qualify in numerical order, starting with the car selected in a random draw.

For the Mark McGregor Memorial Dairy Queen 150 on August 6, 2016 the number drawn was car 88, so that car qualified first.

The finishing order from qualifying was car 55, 17x, 70, 17, 62, 8x, 12, 97, 88, 38, 10, 04, 56, 9, 12x and 8.

The rules state top 16 cars from qualifying go into heats A and B, split odd/even, then inverted. The rules also state that cars 17 to 24 go straight up into Heat C. If more than 24 cars are registered, cars 17 and up go straight up into a B Main of 25 laps.

Also in the rules is if there are 20 or fewer cars, cars 17 to 20 will go into the A and B heats, starting at the back. As there were 16 cars registered for August 6, there was no heat C

Heat A was the odd cars from time trials. With the inversion rule applied, this was P15, P13, P11, P9, P7, P5, P3 and P1

Heat B was the even cars from time trials. With the inversion rule applied this was P16, P14, P12, P10, P8, P6, P4 and P2

This means the heat A lineup was:  
12x, 56, 10, 88, 12, 62, 70 and 55

This means the Heat B lineup was:  
8, 9, 04, 38, 97, 8x, 17 and 17x

The finishing order of Heat A was 70, 10, 55, 62, 12, 12x, 88 and 56  
This became the inside row of the feature before inversion

The finishing order of Heat B was 17, 97, 17x, 38, 8x, 04, 9 and 8  
This became the outside row of the feature before inversion

This means the preliminary lineup before inversion looked like:

70	17
10	97
55	17x
62	38
12	8x
12x	04
88	9
56	8

Cars 55 and 17x accepted the challenge to start at the back and the inversion for the race was 10. The inversion was determined with a dice roll.

**So the final line up for the start of the Mark McGregor Memorial Dairy Queen 150 was:**

<b>04</b>	<b>12x</b>
<b>8x</b>	<b>12</b>

38	62
97	10
17	70
88	9
56	8
17x	55
